

Covid-19 vaccines are unsafe and therefore illegal!

- In March 2020 Denmark was shut down
- In May 2020 we could see that the deaths with covid-19 were on average older than the life expectancy + sick of 2 to 3 other diseases.
- In December 2020, the first people were vaccinated with the Covid-19 vaccines. The vaccines were sold as safe and effective. Since May 2021 there had been excess mortality in Denmark.
- During 2021 and 2022, there was a lot of pressure on Danes to get vaccinated against covid-19
- In December 2021, Parliament and others are told in Open Letter #1 by statistician Max Schmeling that some vaccine batches in the US have **harmed 5 thousand times more** than others - a difference of **500,000%**. And it warns that something similar is probably also happening in Denmark
- In January 2022, the Folketing and others are told in open letter no. 2 from statistician Max Schmeling that some vaccine batches also in Sweden and Denmark have harmed thousands as much as other batches
- In January 2022, the Danish Medicines Agency, in cooperation with the Danish Serum Institute (SSI) and the Minister of Health, answers questions to open letter No. 1.
- In January 2022, Parliament is asked to speed up a response from SSI on the number of doses given per batch
- In February 2022, the Minister of Health circulates the SSI's response to the public
- In March 2022, Statens Serum Institut (SSI) finally responds on how many doses have been given per batch
- In June 2022, Max Schmeling submits evidence in his 4th open letter (**Link 1**) to Parliament and others that **the most harmful batch has harmed 118 thousand as much per dose as the least harmful batch per dose.**
- **This corresponds to a difference in harm of 11.8 million % per dose. In other words, the vaccines are unsafe.**
- The question is not how many shots did you get? The question is which batch (if any) you have been injected?
- Who is responsible for this scandal?
- **Vaccination against Covid-19 has been and is illegal, according to the Health Act §15, paragraphs 1 and 3 and the Oviedo Convention**
- It can be seen that the problem that the Folketing, the Government, the Health Authority, the Medicines Agency and SSI etc. were warned about in the first open letter in December 2021, is far worse than first thought!
- Why do the authorities, SSI, politicians and TV/radio/newspapers not inform about these facts?
- Covid-19 vaccines are therefore unsafe, illegal and in violation of "First do no harm"
- Similarities have been documented for Pfizer's vaccine in more than 30 countries, the EU and worldwide (**link 2**)
- It is obvious that we cannot trust and have confidence in the above actors including EMA, FDA and WHO!
- **Besides, there has been known other safe and effective treatments against covid-19 have been known since March 2020, - like for example vitamin D, Zink, Hydroxychloroquine, Ivermectin, - and other antioxidants**

In any case: Keep you and your loved ones far away from the covid-19 injections, which are proven unsafe with a variation in adverse reaction per dose from each batch of 11.8 million %,

- and spread the word, now!

Adverse reaction rate per batch from the Pfizer alias Comirnaty vaccine - divided into three types

- We see here the division of the Pfizer vaccine batches into 3 groups/types according to how many adverse reactions have been recorded from them
- Vaccine type 2 and type 3 give on average 28.7 times and 1034 times as many side effects as type 1
- On a single batch, however, the difference is much higher, at 33,480 times, a difference of 3.3 million
- For example, more than 180 out of 1000 doses caused adverse reactions for batch EJ6796. It corresponds to over 18%.
- It should be seen in the light of the fact that experience shows that only 1 to 10% of adverse reactions are detected!

Below is the distribution of Adverse reaction and doses from Pfizer - in relation to the three types

- **Translation:** Dødsfald=Deaths, Alvorlige bivirkninger=Serious Adverse Reactions (AR), Bivirkninger=AR, Doser=Doses
- The implications of this are that even if you personally have not experienced death, serious side effects or adverse reactions to the vaccine, many have. You have probably received a dose from the 32+64=96% from type 1 and type 2, - that has not harmed as much as type 3

Below is the distribution of the three types of Pfizer vaccine – injected into different age groups

		Age-Group										
		0-9	10-19	20-29	30-39	40-49	50-59	60-69	70-79	80-89	90-99	100+
Vaccine	Type 1	19%	29%	6%	2%	3%	5%	9%	17%	10%	0%	0%
	Type 2	0%	9%	9%	8%	17%	20%	16%	16%	6%	0%	0%
	Type 3	0%	0%	9%	16%	18%	24%	11%	8%	10%	3%	0%
